Mathematics 3790H – Analysis I: ~~Real~~ Fake analysis

Trent University, Winter 2015

Assignment #6
Faking it!
Due on Friday, 27 February, 2015.

In some fields it is more importat to be *convincing* than to be right. Let's try this:

1. Devise a plausible-sounding, but false, proposition concerning sequences or series, as well as an as plausible as you can "proof" for it. Explain why the proposition is actually false and the proof fails. *[10]*
